

Week 9, Friday November 8, 2024

Main topics

- Homework 2
- Nonlinear inverse problems - examples, challenges and linearization.

Material

Everything from Week 1 - 8.

New material: Kirsch 6.1-6.3 (EIT)

Program

12:30-15:30 Homework 2. I will be around in 324/020 from 12:30 or so.

15:30-16:30 Lecture: Nonlinear inverse problems - examples, challenges and linearization.

16:30-17:00 Last questions to HW2.

Homework

You will find the problems for homework 2 in DTU Learn/assignments. You can work with the problems during the week, and discuss challenges with fellow students in the exercise session on Nov. 8.

The deadline for submission of the solutions is set to Wednesday November 13 at noon. It is a requirement for passing the course that all homework are approved.

Exercises

No new exercises; time for Homework 2.
